For Immediate Release

“October is Breast Cancer Awareness Month”

OTTAWA, IL – October is Breast Cancer Awareness Month. Breast cancer is the most common cancer diagnosed in women other than skin cancer, and is the second leading cause of cancer deaths for women. The good news is that most women can survive breast cancer if it is found and treated early.

A mammogram – the screening test for breast cancer – can help find breast cancer early when it is easier to treat. Low-income women and women with no insurance die from breast and cervical cancer more often than other women. These high mortality rates are attributed in part to the fact that these women generally do not receive regular mammograms and Pap smears. As a result, cancers are diagnosed at later stages when it is more difficult to treat and the chances for survival are less.

LaSalle County Health Department, through our Illinois Breast and Cervical Cancer Program (IBCCP) grant, can pay for mammograms and Pap smears for women who qualify. You may qualify if you are a LaSalle or Grundy County resident between the ages of 21-64 for breast and cervical cancer screenings. Through IBCCP, LaSalle County Health Department is working to increase breast and cervical cancer awareness and break that cycle of late-stage treatment. IBCCP provides FREE mammograms and Pap smears for those women who qualify and assistance with paying their deductible for those who are insured. Take advantage of this opportunity for early detection. You are important to your family.

Call (815) 433-3366 for further information on how to receive a free mammogram and Pap test.
